

## Web2Access Test Form

	Test	0	1	2	3
1	Are login, signup and other forms accessible?				
2	Are text alternatives offered for images etc?				
3	Is the target for every link clearly defined?				
4	Do frames and iframes have appropriate titles?				
5	Is the page fully functional and fully navigable without the stylesheet?				
6	Do all pages with audio or audio/video features relevant to content offer alternatives?				
7	Do all pages with video/animation features without audio or descriptive dialogue, offer alternatives?				
8	Are tables used inappropriately to format the page?				
9	Is tab order logical?				
10	Are the pages beyond login functional and navigable with the keyboard?				
11	If a rich-text editor is used is it accessible? If no rich text editor, score same as 1.				
12	Is there appropriate feedback after submitting information and adequate time allowances?				
13	Is the content comfortable to read with good colour contrast levels and no colour deficiency issues?				
14	Does the page maintain its style and usability when the browser zoom feature is used?				
15	Is text size and style suitably readable? Is there any blinking or flashing?
